

Functionality/interactions we mos def want the app to have	Possible functionality/interactions	Functions/interactions we want to avoid		Questions to consider....	
capable of downloading and archiving formal evaluations	alternate ways of data visualization?	small and/or excessive text		How do we keep data secure?	
capable of downloading and archiving student EOC/EOG scores	ways to utilize swiping?	unnecessary work for teacher		How will we make it 508 compliant?	alt text, descriptive attributes for web elements, captions for videos, tagging for data tables, logical reading order, voice over
self-reflective "tweets" (/DIY tagging?)	expanded desktop version?	anything that feels like a spreadsheet			using colors and patterns
storing and tagging of student assignments	ways of mixing/matching different kinds of data side-by-side	slow			
ability to track trends over time	calendar as some kind of base structure			What is the user's "final product" (or how are we making the app in reaction to that question)?	
ability to choose indicators to track over time	self-tagging templates? a basic set that user can opt into or out of?			What kinds of algorithmic functions can we use Python for?	
"export portfolio" or "export report" option (by year/semester/etc.)	community aspect (sync or share with other users? forum comments etc.?)			What kinds of user variation might exist within our user base?	
sync with external standardized data	potential for student surveys/input			What will our usability tests look like? with whom? (printing out wireframes...)	
mobile-ready	logging/providing evidence of leadership within school/district				
color coordinated (but not solely, re: accessibility)	evidence of leadership within larger community				
simple home screen with quick access (and quick add feature)					
iOS/Android compatability					
simple, clear icons					
customizable interface/customizable quick add button functions					
"How To" interactive when first downloaded					
set up questions: how is your year/week/day structured? (semesters, A/B days, 7 period days...)					
return access to intro "how to" setup					
ability to delete your data at any time: "right to be forgotten"
