Date:	Issue:	Posted By:	Proposed Resolution:								
4/8	Will we record the usability testing sessions?	Caroline	no.								
	Should teachers be able to create multiple boards/spaces for different classes?	Caroline	For usability testing, turn off account set-up screen (make board for each class, enter email, etc)								
	LONG-TERM: Which screens will we attempt to code?	Caroline									
	LONG-TERM: How do we want to maximize using GitHub with this project?	Caroline									
	What data samples should we use for the prototype?	e Caroline									
	Alt text/caption ability for photo upload?	Caroline									
	What specific elements of 508 compliance do we want to highlight in ou presentations (and in our accessibility statement)?	r Ericka									
	Make "Usability Testing" spreadsheet for responses etc.	Caroline									
	How will we keep data secure [other than password protection]	1 Ericka									
	How should we address the issue of student consent/agency over the data collected on them?	Ericka									
4/12	Need to clarify "swipe right" and "swipe left" (is "left" the motion in which you're swiping, or the direction in which you're heading?); find language that is clear but also aligns with norms of what left and right are	Caroline									
	Need a way to symbolize "swiping" back left or right to get back to home screen (color semi-circle??)	Caroline									
4/15	Need to add "create boards for different classes" in tutorial and in interface	Caroline									
	Need to clarify tutorial sequence with customizing settings	Caroline									
	Need to decide input/output terms	Caroline									
	Need to pick consisted transitions for X- ing out, sliding back Home, etc.	Caroline									
	Is term going to be too ambitious for our scope? Kind of hard to make "airtight" m	Caroline	Yes, we will stick with user defining date range								
	Need to figure out exactly what this output graph will look like	Caroline	Will go into more detail for presentation								
	Swiping doesn't work on prototype (it get confused); tapping only!	s Caroline	Tappity tap tap								
	Should we move settings wheel to the top? It's hard to go back to where you were if you accidentally click it	Caroline	Can move to top right, don't need to include on "pop-up" screens
